Fuel Systems

Bulletin No.: RS-48 Rev. 2

Date: 2-1-78

Revised: 1-8-79

Subject: THE 100 PERCENT REPLACEMENT OF FUEL INLET STRAINERS AT EACH OVERHUL.

1. PLANNING INFORMATION:

A. Effectivity:

All RS and RSA Fuel Injectors.

B. Reason:

To require the 100 percent replacement at overhaul of all fuel inlet strainers, precluding the possibility of reinstalling a partially plugged strainer.

Revision 2 adds additional part number.

C. Description:

Refer to applicable overhaul manuals for removal and installation instructions. Units not equipped with a bypass strainer will require new inlet fitting and plug described in paragraph G of this section. Those units containing the bypass strainers need only replacement of the strainer assembly.

D. Compliance:

Operating Activities: Information only.
Overhaul Activities: "Comply at overhaul."

E. Approval:

None.

F. Manpower:

No additional man-hours required if performed during normal overhaul.

G. Material Availability:

All replacement parts are procurable from Bendix Products Support Center referred to in this Bulletin as B.P.S.C.

K. Publications Affected:

All RS and RSA Manuals.

2. ACCOMPLISHMENT INSTRUCTIONS:

RS/RSA 5 and 10.

A. During the course of the normal overhaul of affected units, the following installations must be performed.

1. RS/RSA 5 and 10.

2. ACCOMPLISHMENT INSTRUCTIONS: (Continued)

- a. Assemble the preformed packing to the plug, or where applicable the fuel pressure adapter, and install into the body assembly.
- b. Assemble the preformed packing to the strainer assembly and install the strainer assembly, with the spring end entering fuel inlet port first.
- c. Assemble preformed packing to the appropriate inlet fitting and install to the fuel inlet port of the injector body.

2. RSA-7

- a. Assemble the preformed packing to the strainer assembly and install strainer assembly with the spring end entering the fuel inlet port first. The spring must be centered around the mixture control valve stem and up against the mixture control valve.
- b. Assemble the preformed packing to the inlet fitting, retained from disassembly, and install into the fuel inlet port of the injector body.

B. Continue reassembly of the unit as outlined in the applicable overhaul manual.

C. Identification of modified units.

1. RSA-5AD1 Parts List No. 2524147-5 change to 2524147-6
Parts List No. 2524291-3 change to 2524291-4
2. RS-10 Reidentify the modified units in accordance with Paragraph A of Planning Information of Bendix Service Bulletin No. RS-40 issued 1-31-73.
3. No other reidentification required.
