

SAFETY ALERT

MSA CARBURETOR MAINTENANCE MANUAL USE

MSA FLOAT CARBURETORS

Models: All MA and HA Models

Engine Models: Carbureted Lycoming, Continental, Franklin and Superior Engines

Date Issued: 8/11/2011

Precision Airmotive LLC previously published Float Carburetor Service Manuals relating to the MSA float carburetors manufactured by Precision Airmotive. These manuals were intended for use only with genuine Precision Airmotive replacement parts installed in MSA carburetors manufactured by Precision Airmotive or prior manufacturers (Facet and Marvel Schebler/Borg Warner). The use of these manuals for any other purpose is not authorized by Precision Airmotive.

The MSA float carburetors previously manufactured by Precision Airmotive are now manufactured by Marvel Schebler Aircraft Carburetors LLC (Marvel Schebler®). Intellectual property concerning MSA float carburetors was sold to Volare Carburetors LLC (Now Marvel Schebler®) including the MSA carburetor maintenance manuals. However, carburetors and parts manufactured by Marvel Schebler® (formerly Volare) may have significant changes that are not addressed in the Precision Airmotive manuals. For this reason, Precision Airmotive manuals should NO LONGER be used with carburetors manufactured by Marvel Schebler®, nor for the installation of replacement parts manufactured by Marvel Schebler®. Contact Marvel Schebler® for current service information.

Marvel Schebler® is a registered trademark of Marvel Schebler Aircraft Carburetors LLC

Carburetors manufactured by Avstar Fuel Systems are now delivered by Lycoming Engines and are approved on their type certificate. While these carburetors have similar model designations, parts numbers, and appearance, they were designed and manufactured independently from the MSA series carburetors and have significant differences from the carburetors manufactured by Precision Airmotive. Precision Airmotive manuals should NEVER be used with carburetors manufactured by Avstar, nor for the installation of replacement parts manufactured by Avstar. Contact Avstar Fuel Systems for current service information.

Replacement parts which are FAA-PMA approved for use in MSA carburetors often have significant differences from genuine Precision Airmotive parts. Precision Airmotive manuals should NEVER be used with replacement parts that were not manufactured by Precision Airmotive. Contact the PMA holder for current service information.
