SUBJECT: RSA FUEL INJECTOR CENTER BODY VERSUS CENTER BODY ASSEMBLY

In the recent past, RSA injector center bodies could be procured only as a part of the Center Body Assembly, which included the center body seal. Because of recent changes, the center body is procured now as a piece part and the assembly is no longer procurable.

The following list shows the old assembly part number (which contains the rubber diaphragm seal), the new assembly part number (which contains the bellows seal) and the associated center body part number which applies to either of the two assemblies.

<u>Model Injector</u>	<u>Old Body Assy. (No Longer Procurable)</u>	<u>New Body Assy. (Nonprocurable)</u>	<u>Center Body (Procurable)</u>
